
Agfa HealthCare introduces next generation Computed Radiography solutions at the ECR 2010

Agfa HealthCare, a leading provider of diagnostic imaging and healthcare IT solutions, announces today that it will be launching its next-generation CR systems at ECR 2010. From March 5th to March 8th, the company will be introducing both its DX-M, a CR solution for Mammography and all general radiology needs, and the DX-G, a CR system with outstanding flexibility for general radiography. Both systems have been designed to handle both needle-based detector plates (NIP), as well as standard phosphor plates (PIP). The solutions have been specifically developed to support a hospital
