
Carestream Health Wins Orders For Eleven DR Systems In Scotland

Greater Glasgow & Clyde Health Board are currently completing the building of two new, purpose designed Ambulatory Care Hospitals in and around Glasgow — the Victoria Infirmary on the south side of the city and Stobhill Hospital on the north. As a consequence, Carestream Health has received an order to install three KODAK DIRECTVIEW DR7500 systems at the Victoria Infirmary and a further three DR7500 systems and a KODAK DIRECTVIEW DR3500 system at Stobhill Hospital.

The new Victoria will be one of the largest hospitals in Scotland and is expected to treat around 400,000 patients annually when it opens later this year, while the
