
CleanMed Europe: Let's Talk About Sustainable Healthcare

The COVID-19 pandemic has had a substantial impact on all aspects of healthcare, including its sustainability. The need for more sustainable systems is now clear as never before, and from 23 November till 3 December healthcare leaders are sharing ideas, innovations, challenges and solutions at [CleanMed Europe](#), Europe's leading conference on sustainable healthcare.

"We know from past editions of CleanMed Europe that one of the things our attendees value the most is connecting with like-minded sustainable healthcare leaders with similar interests and challenges. Knowing that you're not alone and sharing experiences with one another helps inspire and motivate us every day," says Healthcare Without Harm, the conference organisers, in a statement.

This year CleanMed Europe is being held in the virtual space for the first time. It focusses on leadership for sustainable healthcare and on ways to not only reduce healthcare sector's environmental footprint but also drive the change at the policy and market levels, necessary to reduce environmental harm and support human health and well-being. Bringing together healthcare professionals, policy-makers, sustainability practitioners and healthcare leaders, the conference showcases cutting-edge practices in sustainable healthcare and provides an opportunity for meaningful discussions. The sessions are grouped into themed conference tracks covering topics such as [climate-smart healthcare](#), sustainable food, or circular healthcare.

23 November

[Opening panel - Perspectives on leadership for sustainable healthcare](#)

[Ensuring transparency and increasing sustainability in the pharmaceutical supply chain](#)

[Circular healthcare: Where to start?](#)

24 November

[Green buildings/infrastructure in healthcare](#)

[Decarbonisation of pharmaceutical and medical devices: Perspectives on the roadmap](#)

[Plant forward diets: Good for your health and the planet](#)

25 November

[Medical textiles - why tackling chemistry is critical](#)

[Infection prevention: Is there a room for safer disinfectants and sustainable use of antimicrobials?](#)

[Creating engagement: Sustainable nutrition in healthcare facilities](#)

[Saving Carbon. Improving Care](#)

[Enhancing AMR education in European medical schools](#)

27 November

[Low-carbon healthcare in the Mediterranean Region](#)

[Safer medical devices: 2020 Progress checklist](#)

[Clinicians engaging with the global environmental movement](#)

30 November

[\(Zero\) waste in Circular Healthcare](#)

[How clinicians can reduce the environmental impact of healthcare](#)

1 December

[Growing food for healthcare](#)

[Reducing pharmaceutical waste and improving access to medicines](#)

[Leadership for a Carbon Net Zero Health System: The Power of Collaboration](#)

2 December

[Carbon impacts of operating theatres/rooms](#)

[Collaborating to achieve healthcare circularity](#)

[Sustainable Procurement Guide and case studies](#)

3 December

[Reusable PPE: Before and after COVID-19](#)

[How Nurses can take climate action: Presenting the Nurses Climate Challenge](#)

[Climate leadership in European healthcare](#)

[Leadership in Action: Becoming the world's first net-zero health service](#)
