Digital Mammography System Cuts Waiting Times At Largest Private Screening Provider in Finland

GENEVA, Switzerland, August 17—Improvements in workflow efficiency and image quality from the installation of KODAK DIRECTVIEW CR Systems with Mammography Feature from Carestream Health, has led to virtually a 50% reduction in referral to treatment time at Suomen Terveystalo Oyj, the leading provider of mammography screening services to Finnish municipalities.

Forty clinics are currently operational with plans to install the remaining two by the end of 2007, completing the rollout to all of the group
