
#ESCCongress 2021 Begins Soon!

ESC CONGRESS 2021

THE DIGITAL EXPERIENCE

The ESC Congress 2021, the world's largest cardiovascular event, begins soon. Get ready for the hottest new science in cardiology from August 27-30.

During the scientific meeting, all areas of cardiovascular disease will be covered across 15 channels. The spotlight this year will be on Sudden Cardiac Death. In addition, the congress will feature a dedicated COVID-19 channel providing latest research and findings from clinical trials.

There is a lot to come during the next four days as highly awaited results from major trials will be released. In addition, ESC Clinical Practice Guidelines with recommendations will be provided on heart failure, valvular heart disease, cardiac pacing and prevention of cardiovascular disease.

Be sure not to miss the latest science in hypertension, heart failure, congenital heart disease, COVID-19 in heart failure, coronary artery disease, emerging cardiovascular interventions, artificial intelligence in cardiovascular imaging, acute cardiac care, acute coronary syndromes, atrial fibrillation, cardiology and cancer, and cardiovascular surgery.

All this and much more to come during the #ESCCongress. For more details on the scientific programme, click [here](#).

Stay tuned for more coverage from the [HealthManagement.org](https://www.healthmanagement.org) team.
