
HIMSS Launches HIMSS23 Europe, European Health Conference & Exhibition in Portugal

HIMSS23 Europe, the most influential digital health conference in the continent, will bring together the region's healthcare ecosystem in Portugal at the Centro de Congressos de Lisboa from 7-9 June, 2023, to explore "Health that Connects + Tech that Cares," HIMSS announced.

[HIMSS23 Europe](#) will address Europe's workforce crisis and other healthcare issues, and serve as a focal point for pan-European collaborations: the European Health Data Space, Gravitare Health and Label2Enable. It will also review the reality of precision health in the region.

Attendees will witness the benefits of EMRAM Stage 7 for patients, clinicians and management at Portugal's leading hospitals. The conference will also explore the potential of national initiatives such as Germany's Digital Radar and France's Maturin-H.

HIMSS23 Europe opens in Portugal with the support of the [Shared Services of Ministry of Health, Portugal](#); [Health Cluster Portugal](#) with its 200 members of the health sector, and other national institutions such as the Portuguese Agency for Investment and External Commerce (AICEP) and the Agency for Competitiveness and Innovation (IAPMEI).

Join HIMSS for education, innovation and collaboration with communities from Germany, Austria, Switzerland, France, Italy, Spain, the Netherlands, the Nordics, and national delegations from Estonia, Belgium and Israel.

[Registration is open](#), with flexible options for delegates.
