
International Society of Radiology establishes global Quality and Safety Alliance

The International Society of Radiology (ISR) has formally established a new format for its quality and safety activities. The ISR Quality and Safety Alliance (ISRQSA) will act as a convener of and facilitator for continental, regional and national quality and safety campaigns in radiation protection and drive the ISR's quality and safety agenda.

Dr. Guy Frija, EuroSafe Imaging Chair of the European Society of Radiology and Dr. Don Frush, Image Gently Chair, were appointed as chairs of ISRQSA during RSNA 2016.

Updates on ISRQSA will be available shortly at www.isradiology.org
