
Monogram Health Adds Karen Abbott to Executive Leadership Team

Monogram Health, the leading value-based specialty provider of in-home nephrology, primary care, and benefit management services for individuals with chronic kidney and end-stage renal disease, has hired Karen Abbott as Chief Administrative Officer and Chief Compliance Officer. Abbott brings more than three decades of experience to the roles, where she leads Monogram's human resources, legal, compliance and risk teams.

"Karen is a demonstrated leader, and her long history of supporting growth stage and private equity-backed health care companies underscores her sharp acumen for the complexities of our rapidly evolving industry," said Monogram Health CEO Mike Uchrin. "Karen has a keen understanding of the unique needs and dynamics among our patients, health plan partners, clinicians and employees. She will be a key leader in our daily efforts to transform the way care is delivered to Americans living with kidney disease."

A Nashville resident for more than 30 years, Abbott most recently served as Chief Legal Officer, Chief Compliance Officer and Corporate Secretary at American Addiction Centers. While at AAC, she advised the company on all aspects of human resources, risk management and regulatory matters, while also managing operations, compliance, risk, and all legal functions for the treatment facilities and corporate office.

"Every day, Monogram's employees make a positive difference in the lives of people impacted by kidney disease," Abbott said. "I'm honored to contribute my expertise to support Monogram's mission and our colleagues nationwide as they deliver the highest-quality, evidence-based care in our patients' homes."
