
Planned To Present A Broad Range Of Digital Innovations At ECR 2020

The [European Congress of Radiology \(ECR\)](#) is the annual meeting of the European Society of Radiology, where professionals within the field come to meet and discuss all the latest developments in the radiological community.

The theme of ECR 2020, "A Clear Vision for Radiology", represents everything radiologists, radiographers, medical physicists, and allied scientists have achieved as a community over the years. With a strong emphasis on artificial intelligence, the meeting includes a wide variety of AI-related content, such as machine learning, deep learning, and big data. Register at the event website to hear about the most recent developments in the field and connect with colleagues from all over the world!

Make sure to also drop by the Planned stand (X2/230), where we will be showcasing a full range of our innovations in digital breast tomosynthesis, mammography, and orthopedic as well as head and neck imaging. We'd love to tell you about our exciting new products and discuss your ideas and experiences in order to find a solution that suits your needs.

Planned Industry Workshops

At this year's ECR, Planned is thrilled to host three industry workshops on **Friday, March 13** as follows:

- Planned Digital Breast Tomosynthesis in Clinical Practice led by **Dr. Elena Vasileiadi Drakotou** and **Dr. Lubomir Trifonov**
- Diagnosis of Complex Foot Problems with Planned Verity® Weight-Bearing CT by **Dr. Ruud H.H. Wellenberg** and **Prof. Dr. Mario Maas**
- Automated Detection of Bone Orientation in Planned Verity® CBCT Data Using Disior Analytics by **Prof. Dr. Jari Salo**

Please find more information about the workshops [here](#).

Register for the workshops at [MyESR.org](#).

Join us in Vienna to gain 'A Clear Vision of Radiology'!
