## Sectra Wins ProMedica Contract

Throughout the agreement, Sectra will supply RIS products and direct service and support. For several years ProMedica Health System has been using Sectra PACS. With this order they will now benefit from the tight RIS/PACS integration delivered by Sectra, which is especially powerful with customers who have demands to deliver radiology services across several institutions and/or communicate between several healthcare providers.

ProMedica Health System owns or operates nine hospitals, accredited by the Joint Commission on Accreditation on Healthcare Organisations. Together these hospitals have more than 2,900 physicians and 15,000 employees that meet the needs of more than 2.5 million patients annually.
