
Shimadzu Presents New Mobile X-Ray System

The unit combines image quality with simple handling and easy maneuverability. With the MobileArt Evolution, exact positioning is possible even in the narrow spaces, thus facilitating X-rays in smaller hospital rooms. In addition, it saves time and transports to the radiology department.

The MobileArt Evolution is available in two versions. The standard version is equipped with an imaging performance of 12.5 kW/320 mAs. The premium version comes with an imaging performance of 32 kW/320 mAs and offers outstanding imaging quality for interdisciplinary applications.

Compared to the predecessor series, awarded the
