
TeraRecon Achieves High Ratings in KLAS Performance Report

TeraRecon has announced its ratings in the KLAS 2013 Advanced Visualization performance report, “Advanced Visualization 2013: How Advanced Is It?”

TeraRecon's scores included positive ratings from their customers for long-term association with the company and future plans to buy.

- 100% of TeraRecon's customers surveyed indicated that the company is part of their long-term plans;
- 94% of TeraRecon's customers surveyed indicated that they would buy the product again; and
- 62% of TeraRecon's customers surveyed indicated that TeraRecon is their best vendor (the second highest score was 33%).

TeraRecon's Advanced Visualization platform includes options for the zero-footprint, browser-based iNtuitionEMV (Enterprise Medical Viewer) as well as a professional multi-modality 2D/3D/4D viewer called iNtuitionREVIEW, all of which support a range of interoperability features to allow integration with other clinical information systems such as PACS, EMR, and VNA.
