
Vietnamese Prime Minister honours VK hospital projects

The Vietnamese Prime Minister, Nguyen Xuan Phuc, visited the project sites of Bach Mai 2 and Viet Duc 2 Hospitals in Phu Ly City, Ha Nam Province, last Saturday, 5th August. These two VK designed 1,000 bed hospitals are part of the Vietnamese Ministry of Health's programme to provide higher quality hospital facilities for the people of Hanoi and northern Vietnam. VK staff were on hand to explain how VK Architects and Engineers have brought together international healthcare design approaches with local standards and requirements.

From their first project in 2011, the VinMec International Hospital in Hanoi, VK Architects and Engineers have been working in Vietnam for 5 years, and have well-established offices in Ho Chi Minh City and Hanoi, providing both healthcare design for public and private sector clients and building engineering design services.
