
Visage Premieres Speed is Everything at RSNA 2012

Visage Imaging, Inc., a wholly owned subsidiary of Pro Medicus Ltd. announced today the premiere of a new video entitled Visage 7: Speed is Everything in support of the 2012 Radiological Society of North America conference in Chicago, November 25 – November 29.

Visage Imaging is exhibiting under the same theme of “Speed is Everything”, in booth #6249, South Building, Hall A, McCormick Place. Visage 7’s amazingly fast, thin-client, server-side processing technology delivers enterprise diagnostic, clinical and mobile viewing solutions for healthcare institutions seeking to dramatically accelerate and enhance the delivery of radiology services.

The new high definition video reinforces the three core pillars of the Visage 7 Enterprise Imaging Platform: ‘Fast. Powerful. Enterprise Imaging.’

Brad Levin, Visage Imaging’s General Manager, North America explained, “Exceptional solutions require compelling tools to help educate and inform the marketplace about technologies that break from the restrictions of the past. To move beyond the status quo, we offer a simple mantra – without speed you can’t; with speed, you can. Truly, ‘Speed is Everything’ in Imaging. Using our exceptional new video, we’re excited to share the virtues of Visage 7 with customers here at RSNA 2012 and beyond.”
