

WPSSTS 2022 Brings Key Healthcare Leaders and Organizations to Confront Top Patient Safety Issues

IRVINE, CALIF. (April 4, 2022) – The [Patient Safety Movement Foundation](#) (PSMF) will host the 8th annual [World Patient Safety Science and Technology Summit](#) (WPSSTS) virtually April 29 and April 30, 2022. The event is co-convened by the American Society of Anesthesiologists, the European Society of Anaesthesiology and Intensive Care, the International Society for Quality in Health Care and the World Federation of Societies of Anaesthesiologists. Creating a powerful forum for industry leaders and healthcare organizations to confront leading patient safety issues with actionable ideas and innovations to transform the continuum of care, the event supports PSMF's mission to reach zero preventable patient harm and death across the world by 2030.

"The last two years have been taxing on the healthcare sector to say the least. The global pandemic placed relentless stress on health systems and medical personnel, which resulted in an increase in preventable medical errors," said Dr. Michael Ramsay, CEO of PSMF. "Our organization is eager to bring key stakeholders together to help develop solutions to dramatically improve patient safety and eliminate preventable patient harm and death."

The summit will include a fireside chat with patient safety luminaries, seven keynote addresses, as well as five panel sessions covering various topics in patient safety led by esteemed healthcare leaders. This year's WPSSTS sessions focus on key issues impacting the healthcare industry, including:

- Overcoming Obstacles for Applying High Reliability Principles in Healthcare
- Embracing the Science of Human Factors to Unleash Safety Innovation in Healthcare
- Patient Advocacy: The Compass for Innovation
- How Regulation Can Support Quality and Value in Healthcare
- Healthcare Safety During the Pandemic

Attendees will have the opportunity to network with top hospital executives, patients and family members who have been impacted by medical error, public policymakers and government officials, as well as leaders across the healthcare continuum. Keynote speakers include:

- Randall Clark, MD, FASA, president of the American Society of Anesthesiologists
- Edoardo de Robertis, MD, PhD and president of the European Society of Anaesthesiology and Intensive Care – ESAIC
- Neelam Dhingra-Kumar, MD, unit head of the WHO Patient Safety Flagship
- Carsten Engel, MD, CEO of the International Society for Quality in Health Care
- Joe Kiani, founder & immediate past chairman of the Patient Safety Movement Foundation, as well as founder, chairman & CEO of Masimo
- Peter Pronovost, MD, PhD, chief clinical transformation officer at University Hospitals
- Thomas Zeltner MD, chairman of the WHO Foundation, Geneva (Switzerland) and deputy chair of the University Council of the Medical University of Vienna (Austria)

The summit is open to anyone interested in actively planning solutions around the leading patient safety challenges that cause preventable patient deaths in hospitals and healthcare organizations worldwide. Discounted registration is offered for students, patients and family members. To register for the 2022 WPSSTS or to learn more about the event, visit: <https://patient.sm/WPSSTS>
