UPDATE ON NON-ACCIDENTAL INJURY

Venue: Holiday Inn, London Bloomsbury

CPD: 6 CREDITS

This event will provide a vital update on non-accidental injury (NAI) imaging.

Divided into three sections, the day will offer a thorough overview of this important topic.

Session 1 will consist of a review of classical skeletal and body injuries, including differential diagnoses and controversies. This is followed by a medicolegal session in which HHJ Tolson QC will speak about the courts, and conduct a mock courtroom scenario. Finally, the third session will look at head injury in non-accidental injury, including a pathologist's and neurosurgeon's perspective.

Educational aims and learning outcomes:

- To refresh delegates in NAI imaging procedures and protocols
- To help delegates understand the general imaging approach during investigations in NAI
- To highlight what we are doing well and what we are doing badly
- For delegates to appreciate the role of the medical expert and court system and to better understand how to formulate reports for the courts and medicolegal system
